

HYDROGEN MACHINES

We are the professional for

Portable hydrogen bottle machine

Countertop hydrogen water machine

Bench type hydrogen water machine

Hydrogen shower machine

Hydrogen water mist and soap

GISE AQUA

HYDROGEN WATER MIST

CLEAN SKIN WITH HYDROGEN WATER MIST

For skin health

Hydrogen water mist which can be used semipermanently!
Use hydrogen water mist which is harmless to the human body
and sterilizes 99.9% of various bacteria for healthy skin care.

The moment the button is pressed

Electrolyzation breaks down water to create hydroxyl ions

It penetrates into skin's pores to sterilize skin trouble causing bacteria and helps eliminate wastes.

99.9% sterilization
—
hydrogen supply
—
exfoliation
—
moisturizing effect
—
waste elimination

created with water
99.9% sterilizing
cosmetic
moisturizer

Three special benefits of hydrogen water sterilizing mist

Convenience

Convenient button for quick creation of hydrogen water

Health

Harmless to the human body and 99.9% sterilizing action

Economical

Tap water or bottled water can be used for semipermanent use

Skin care!

How did you do it before?

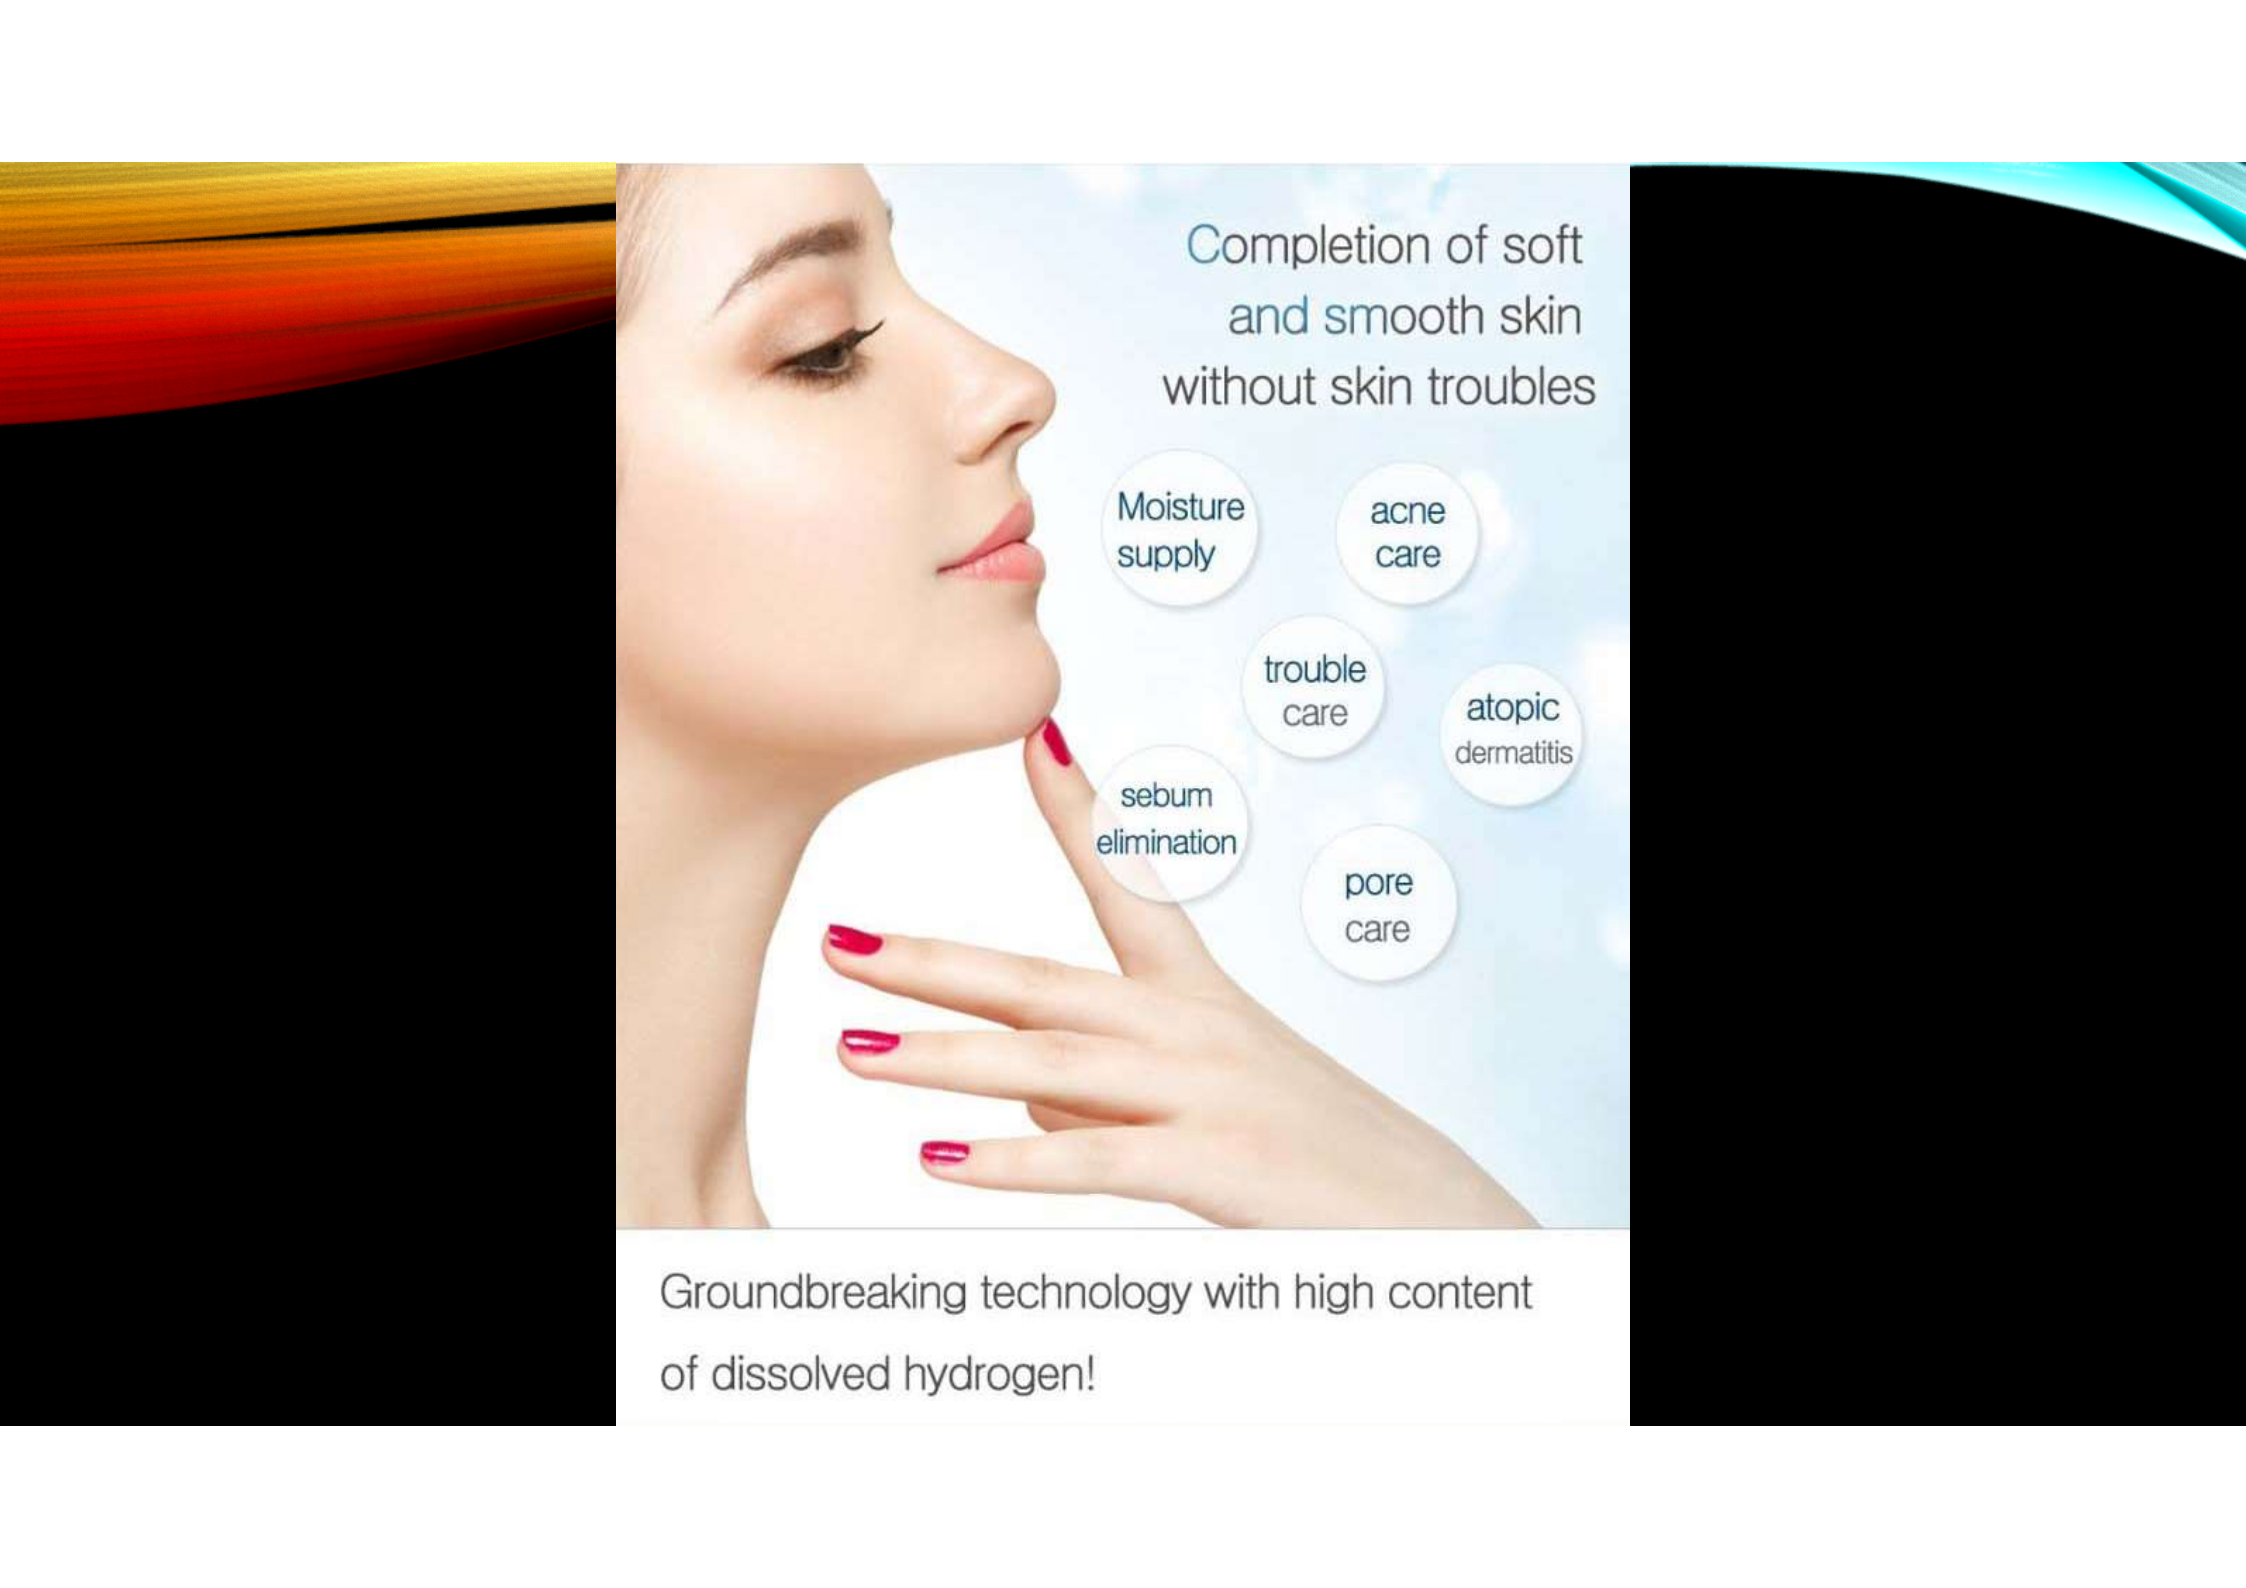

.....
You want white and clean skin, right?
.....

Various skin troubles caused by
dirty wastes in the pores!

Eliminate bacteria with [hydrogen water mist](#)
which can resolve your concerns for skin!

By supplying moisture, oxygen, and hydrogen, it exfoliates, removes sebum,
and provides moisturizing effect to relieve
the symptoms of acne, atopic dermatitis, and skin troubles.

Completion of soft
and smooth skin
without skin troubles

Groundbreaking technology with high content
of dissolved hydrogen!

Semipermanently use the **hydrogen water mist** which is harmless to the human body, which has waste removal and sterilization effects!!

Use of tap water or bottled water

Environmentally friendly sterilizer is portable so it can be used anytime, anywhere, by using tap water or bottled water.

Platinum titanium With

platinum titanium electrode plate, it can be used semipermanently.

Platinum titanium electrolysis technology

The patented, innovative platinum titanium electrolysis technology quickly and safely breaks down oxygen and hydrogen from water to strongly dissolve and disperse hydrogen between water molecules.

What is the principle of innovative and environmentally friendly sterilizer?

When the power is turned on,
bubbles (hydroxyl ion created from water electrolysis) are created.

Electrode plate Hydrogen creation device

Insertion of hydrogen creation device will provide sterilization effect.

General water molecules clusters of 120 – 250Hz are electrolyzed to form clusters of 50 – 60Hz for penetration into pores to sterilize skin trouble causing bacteria and help remove wastes.

Sterilization process and principle

Creation of hydroxyl (OH·) through electrolysis of water molecules

salmonella

pneumococcus

99.9% sterilization effect

99.9% of disease causing staphylococcus aureus, salmonella, pneumococcus, and colon bacillus are sterilized.

Clean skin with hydrogen water mist!

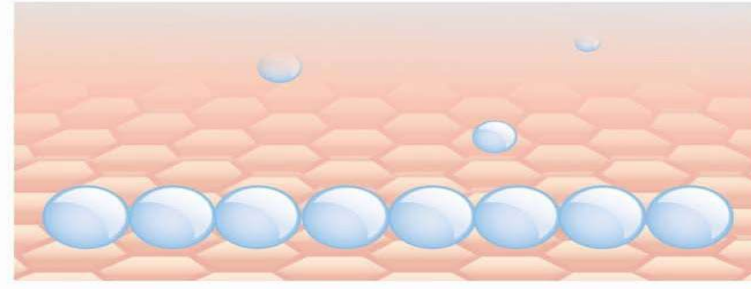

Ultrafine bubbles eliminate wastes from pores
Ultrafine bubbles smaller than the pores eliminate various wastes from skin and sterilize harmful bacteria to help improve skin disease.

Comparison of pore penetration of general water particles and hydrogen water mist

General water particles

General water particles are large particles such that they cannot penetrate into pores and only cleanses the surface.

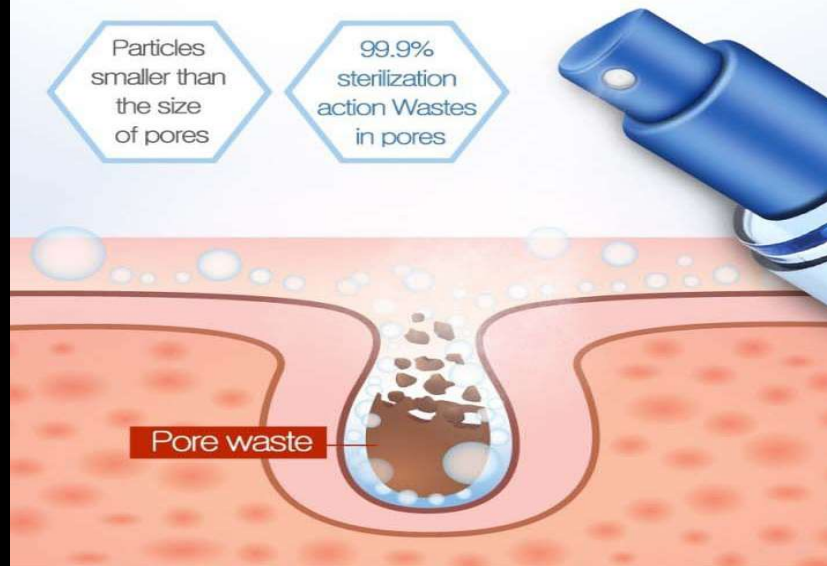

Hydrogen mist particles

Penetrate pores to cleanse wastes.

Particles smaller than the size of pores

99.9% sterilization action Wastes in pores
